True Day/Night dome camera designed to have an aesthetic appearance with excellent picture quality, exceptional functionality and high reliability.

Ikegami, the worlds leading company in the field of high quality broadcast and professional video production equipment, is proud to announce the 'ICD-609P/609' True Day/Night Family of Static Domes. They have high resolution, a massive 540TVL (Colour mode) and 570TVL (Monochrome mode), plus the added benefit of True Day/Night changeover function equipped with a Varifocal auto iris lens and are available in a standard internal housing or a vandal resistant housing. They have higher sensitivity at low light levels when the cameras will automatically switch to a Monochrome output for improved low light performance.

Super Dome Colour Camera

Designed to be unobtrusive and not conflict with the aesthetic properties of commercial and residential areas, the ICD-609P/609 comes complete with internal polycarbonate housing or in a vandal resistance aluminum housing.

0.037Lux, True Day/Night Change-over Function

Well designed moving IR cut filter system, inter-connected with the Automatic Gain Control system makes the ICD-609P/609 the ideal Day/Night camera, capable of providing a high quality crisp picture reproduction with 570TVL horizontal resolution under ultra low light conditions down to an amazing 0.08lux/f1.2 (Type31) and 0.12lux/f1.5 (Type92) minimum scene illumination performance.

540/570TVL, High-Resolution Pictures

DSP-based detail correction function results in a sharper image and better Signal-to-Noise ratio. The horizontal resolution is as high as 540TVL in the colour mode and as high as 570TVL in monochrome mode.

52dB, High Picture Quality and Low Smear and Noise

The improved DSP circuit permits more than 52dB Signal-to-Noise ratio with good performance of -110dB vertical pixel overload protection.

Built-in Varifocal with DC drive Iris control

Equipped with a choice of Varifocal lenses to meet the needs of most installations. Two types of Varifocal lenses are available, either a 2.9-10mm or a 9-22mm can be supplied.

Focus EZ Function

Just press the button located at the back of the unit, and the auto iris lens aperture will be kept open even in broad daylight. This ensures that an accurate focus can be set with the best depth of field.

Wide Auto White Balance

The unit is also provided with automatic tracking white balance control (ATW). Improved tracking colour range can be used under different lighting conditions such as Sodium light.
